Checklist of Tic Symptoms (Motor)

1 = not intense/obvious 5 = profound level of intensity/obviousness

Tourette Syndrome is a neurological or "neurochemical" disorder characterized by tics – involuntary, rapid, sudden movements or vocalizations that occur repeatedly at irregular intervals.

Simple Motor Tics: sudden, meaningless movements of individual muscle groups.	Observed in the past year	Present in the past week	Intensity/ Obviousness (1 – 5)	Disruptive/ Impairing (1 – 5)
Eye blinking				
Facial grimacing				
Nose twitching				
Lip pouting				
Shoulder shrugging				
Arm/head jerking				
Abdominal tensing				
Kicking				
Finger movements				
Jaw snapping				
Teeth clicking				
Frowning				
Knuckle cracking				
Tensing parts of the body				
Rapid jerking of any part of the body				
Other:				

Complex Motor Tics: a group of movements using more than one muscle group which may appear purposeful.	Observed in the past year	Present in the past week	Intensity/ Obviousness (1 – 5)	Disruptive/ Impairing (1 – 5)
Hopping				
Touching objects (or others or self)				
Throwing				
Twirling				
Bending				
Dystonic postures				
Biting the mouth, lip or arm				
Head banging				
Writhing movements				
Rolling eyes upwards or side-to-side				
Making funny facial expressions				
Kissing				
Pinching				
Pulling back on a pencil while writing				
Tearing paper or books				
Copropaxia: making obscene gestures such as giving "the finger"				
Echopraxia: imitating gestures or movements of other people				
Other:				

Checklist of Tic Symptoms (Vocal or Phonic)

Disruptive/

1 = not intense/obvious 5 = profound level of intensity/obviousness

Tourette Syndrome is a neurological or "neurochemical" disorder characterized by tics – involuntary, rapid, sudden movements or vocalizations that occur repeatedly at irregular intervals.

Simple Vocal (or Phonic) Tics: meaningless sounds	Observed in the past year	Present in the past week	Obviousness (1 – 5)	Impairing (1 – 5)
Throat clearing				
Coughing				
Spitting				
Screeching				
Barking				
Grunting				
Gurgling				
Clacking				
Whistling				
Hissing				
Sucking sounds				
Syllable sounds such as "uh, uh," "eee," and "bu"				
Other:
