# Welcome to Healing Gardens

Healinggardens is a locally owned design, garden, and landscape service. We are committed to wellness and integrating the aesthetic beauty and healing power of gardens into our lives and our land.

We create beautiful garden properties in which to relax or entertain. From passive gardenscapes to active gardening, we will help you develop your outdoor environment. We teach plant knowledge and maintenance for your garden.

## Philosophies

### **Nurture with nature.**

Deep natural relationships are invigorating and balancing. Horticultural activities have preventative and therapeutic health qualities. Gardening in a motivating environment is exercise that is both stimulating and rewarding.

### **Evolving design.**

Designs for land and home that evolve and mature over time into their full potential. Install and complete stages of the design at your budget's discretion.

A lush garden with a stone path, a large tree, and various plants. The garden is well-maintained and features a variety of greenery, including a large tree in the background, a stone path leading through the garden, and a large, covered object in the foreground. The overall scene is bright and sunny, suggesting a pleasant outdoor environment.

# 1 Gardens

**A garden provides pleasure for all the senses and is a benefit to everyone.**

With all the different styles of gardens, from aromatic to Zen, and all the custom combinations in between, a garden can become as beautiful and unique as its owner. We would love to help you design and create something special for you and your family.

# 2 Wood

## Decks Arbours Pergolas Trellis Fencing Sheds

The addition of a beautiful wood structure to your property can provide shade, help define space, and can be a reflection of personal style.

An arbour can help create an elegant and formal entrance to a special part of the garden or property.

A pergola with vines is a quick, natural, and easy way to achieve shade, especially in newer developments, where young trees may need many years to mature into shade providers.

Deck and fence: A well designed and built deck can provide an area for entertaining, barbequing, or relaxation, while a fence or wooden screening can provide a touch of privacy.

Patios Walkways Retaining Walls & Steps

Stone can be the perfect compliment, or solution, to any garden. It also allows an individual to easily expand their outdoor living space with the addition of a patio. When done properly, stone can be one of the strongest statements a person can make in their landscape.

# Water

## Water ponds and Features

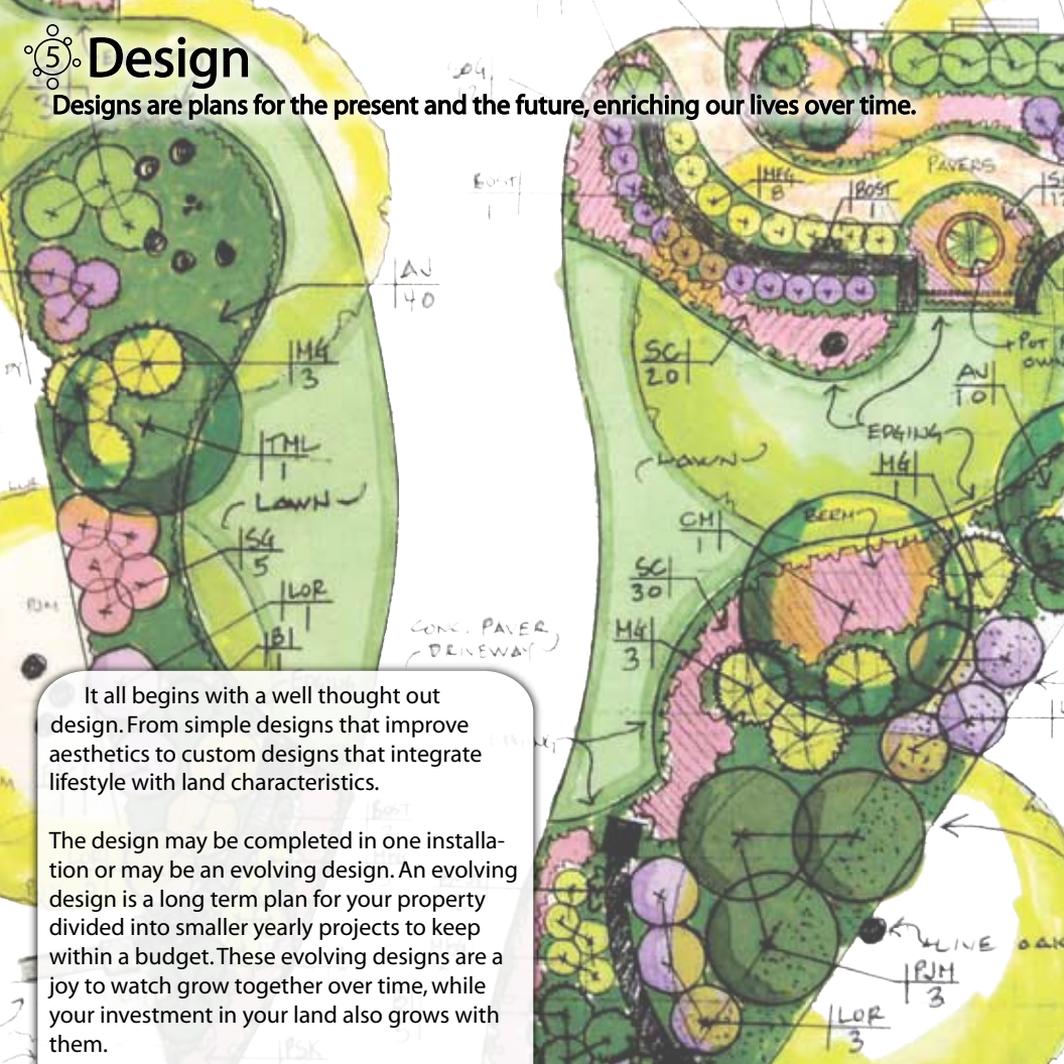

Water adds a deeper dimension to today's gardens and properties. There is a water feature to suit almost every homeowner and property.

Water features offer a calming and reflective element to any garden.

Water features can range from a simple fountain, or a pondless waterfall, all the way to a complex ecosystem which can help sustain life for plants, fish, and other neighbouring animals.

# 5 Design

Designs are plans for the present and the future, enriching our lives over time.

It all begins with a well thought out design. From simple designs that improve aesthetics to custom designs that integrate lifestyle with land characteristics.

The design may be completed in one installation or may be an evolving design. An evolving design is a long term plan for your property divided into smaller yearly projects to keep within a budget. These evolving designs are a joy to watch grow together over time, while your investment in your land also grows with them.

# Education

We are pleased to provide any level of information and instruction a client may be interested in. Our horticultural practices are based in a deeper understanding of the healing nature of plants and their specific applications with people. Plant knowledge is offered as part of our services or on a one-to-one basis.

## Services

**Garden designs.** Styles and plants to suit anyone's needs.

**Landscape Design and Installation.** One time or evolving over time.

**Natural stone and interlock brick** patios, walkways, and retaining walls. Design and construction.

**Water features,** ponds, waterfalls, fountains, and pondless water features. Design and build.

**Decks,** pergolas, arbours, fences, and sheds. Design and construction.

**Maintenance and Rejuvenation** of gardens, commercial properties, and ponds. Occasional or regular.

**Education.** Advice and consultation for creating and maintaining your personal landscape projects.

**Our reasonable rates** start at \$35 hr.

## Complimentary initial consultation.

We always appreciate the chance to have a personal consultation with you on your property at no cost. Feel free to give us a call or email. We would love to be of service to you.
