"Must Have" Infant Airway Tools for every ICU!

The **BABY E.T. TAPE™** and **NEO₂-Safe™** Provide
Safe and Effective Tools for Infant Airway Management.

The New **Hydrocolloid** based **BABY E.T. TAPE™** tube securing system provides a safe, easy and hypoallergenic method for securing all your infant Endotracheal tubes, NG tubes and Nasal cannulas. Finally placement or repositioning of any tube is a snap!

The **NEO₂-Safe™** manifold duckbill valve allows for suctioning and easy instillation of surfactant without disruption of ventilation or loss of CPAP for your smallest infants.

OxiMax pulse oximetry is available in leading patient monitoring systems

As the industry leader in pulse oximetry, we've been tailoring products for neonatal patients for more than two decades. Today you can choose from several Nellcor® OxiMax® sensors designed for neonates, including sterile adhesive sensors with LoSat™ expanded accuracy. LoSat helps you better manage patients in the challenging lower saturation ranges. Plus, our latest signal processing technology lets you effectively monitor wiggling infants with weak pulses. Nellcor in the NICU—just the right fit.

For free continuing education courses on topics such as neonatal skin integrity, check out our Center for Clinical Excellence website at www.nellcor.com/ccexcellence.

Introducing the *AirLife™* Infant nCPAP System

Cardinal Health has developed a comprehensive solution for infant nCPAP applications – the *AirLife™* infant nCPAP system. With a unique combination of advanced components and an innovative, patent-pending variable flow vortice technology, the *AirLife™* infant nCPAP system has been engineered for maximum performance, reliability and patient comfort – because the less discomfort a patient experiences, the greater the opportunity for healthy growth and development. Developed with the assistance of clinical experts and designed to incorporate best-in-class nCPAP technology, the *AirLife™* infant nCPAP system provides a solution that delivers superior infant treatment.

Pioneering For Progress. Innovation For Life.

To learn more about the *AirLife™* infant nCPAP system, contact your Cardinal Health sales representative or call 1.800.637.1500.

MAQUET

IMPROVE CLINICAL PERFORMANCE IN THE MRI SUITE SERVO-i FROM MAQUET

CRITICAL CARE

To get the MAQUET report,
visit www.mrivents.com,
call 1-888-MAQUET3
x2306 or email
info@maquet-inc.com.

Critically ill patients on acute care ventilators often need MRI exams. Yet strong magnetic fields severely limit the types of medical devices that can be nearby.

Transferring patients out of the ICU and changing mechanical ventilators during transport can increase complications due to disconnection and lack of sophisticated ventilator support.

MR Conditional symbol

The SERVO-i MR Environment Option from MAQUET can provide optimal ventilator support for any critically ill patient during MRI procedures. To get the MAQUET report, "Bridging the ICU and MRI Suite with Advanced Ventilator Support," visit mrivents.com, call 1-888-MAQUET3 x2306 or email info@maquet-inc.com.

PRODUCTS AND SERVICES

Respondents were asked to select up to five categories that applied to their companies. We used previous information for firms that didn't return forms. Also, if companies selected inappropriate or duplicate categories, we made a judgment call on the proper categories. Companies which returned forms this year have a more complete listing of all their product categories in the alphabetical section. Companies are responsible for the accuracy of all information in this directory.

Why use 2*

When one will do.

*The New Improved StatCO₂[®] and Mini StatCO₂[®]
End Tidal CO₂ Detectors ... provide enhanced **economy**.*

With 24 hours of ET Tube Monitoring.

How often have you successfully completed initial positive ET tube placement verification with an end tidal CO₂ detector only to find that the intubated patient needs to be moved or transported?

The AHA guidelines state, "Growing evidence suggests that tracheal tube dislodgements after a successful tracheal tube insertion may be occurring at much higher rates than previously suspected. An end tidal CO₂ indicator placed on the ET tube ... can alert the clinician to tube dislodgements during transport."¹

Some CO₂ detectors are only active for 2 hours. To stay within the guidelines that can often mean having to open another device each time a patient is moved. That's not the case with StatCO₂ or Mini StatCO₂. One StatCO₂ or Mini StatCO₂ provides 24 hour performance. With one StatCO₂ or Mini StatCO₂ you can monitor proper ET tube placement initially and as often as necessary after each move within a 24 hour period. So StatCO₂ and Mini StatCO₂ are significantly more economical to use than some other CO₂ detectors!

But **economy** isn't the only advantage. Both also provide enhanced **reliability** and **convenience**.

StatCO₂ over 15 kgs body weight.
Mini StatCO₂ 1-15 kgs body weight.

StatCO₂ and Mini StatCO₂ ...

*Verification with Enhanced **Economy, Reliability and Convenience.***

Substance Abuse and the Newborn: Review,

The NEW Improved StatCO₂ and Mini StatCO₂ ... Verification with Enhanced Reliability.

Reliably performs for 24 hours.
Reliably performs in 100% humidity.

StatCO₂ and Mini StatCO₂ allow you to easily comply with recent AHA Guidelines recommending secondary ET tube placement verification initially and during transport.¹

With one StatCO₂ and Mini StatCO₂ you can reliably monitor proper ET tube placement initially and as often as necessary after each patient move within a 24 hour period ... and they are not affected by humidity.

But Reliability isn't the only advantage of StatCO₂ and Mini StatCO₂. Both also provide enhanced Economy and Convenience.

StatCO₂ and Mini StatCO₂ ...
Verification with Enhanced Economy, Reliability and Convenience.

*The NEW Improved StatCO₂ and Mini StatCO₂ ...
Verification with Enhanced Convenience.*

*Convenient pull tab activation strip.
Convenient 24 hour performance.*

Some CO₂ detectors are activated the minute you open the foil package. Both StatCO₂ and Mini StatCO₂ include a convenient pull tab activation strip that protects them. So you can take StatCO₂ or Mini StatCO₂ out of the package and have it ready for use when and where you need it for a full 24 hours.

StatCO₂ over 15 kgs body weight.
Mini StatCO₂ 1-15 kgs body weight.

But **Convenience** isn't the only advantage of StatCO₂ and Mini StatCO₂. Both also provide enhanced **Economy** and **Reliability**.

20.9

Isn't it strange how a peculiar number such as 20.9 can make us stop for a moment? And for what? Is it the Olympic record for the 200 meter dash, or the square root of 438? Or maybe it has no meaning at all and you just wasted the last 20.9 seconds of your life?

The reality is 20.9 is the heartbeat and focus of our company. It is the reason we put so much time and effort into researching and developing our products. It is also a measurement of our precision and quality.

So what's in it for me, you ask?

Well, you have two choices:

One, you can ignore everything you just read and wish that you had just skipped past this page in the first place. Or, you could be one of the lucky 209 people to visit:

INVOS[®] System cerebral/somatic oximetry: Proven in pediatrics. Now for neonates.

The only device of its kind, the INVOS System allows placement of up to four NIRSenors™ to measure regional oxygen saturation (rSO₂). Using near-infrared spectroscopy (NIRS), this vital sign noninvasively tracks the stability of cerebral and peripheral circulations in real time, helping you intervene early to reduce or prevent ischemic complications in the NICU.

- Designed expressly for neonates
- Continuous, noninvasive monitoring
- Site-specific tissue perfusion
- Accurate, reliable and patient-friendly
- Early detection of ischemic problems

REFLECTING THE COLOR OF LIFE[®]

SOME MIGHT SEE A PREMATURE INFANT.
WE SEE A 14-MONTH-OLD TAKING HER FIRST STEPS.

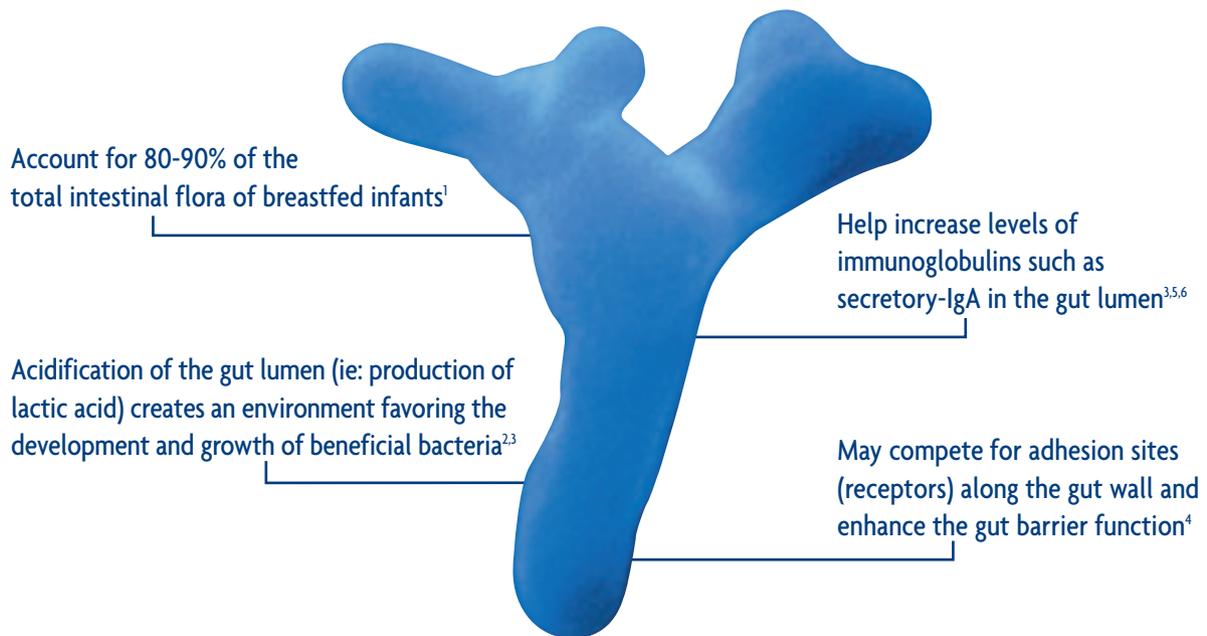

At Children's Medical Ventures, we look beyond today and imagine what tomorrow might hold. It's what drives us in our quest to improve developmental outcomes. We provide NICU professionals and parents with the products, programs, and expertise that make a difference. So a premature infant struggling to survive today might enjoy a normal, healthy life tomorrow. For us, it's the most important job in the world.

VENTILATION

Ventilation Requires Perfect Balance

Only the SensorMedics 3100 HFOV manages the most delicate balance in mechanical ventilation— Recruitment AND Protection.

Overwhelming scientific and clinical data proves that High Frequency Oscillatory Ventilation provides **both** lung protection and lung recruitment. It's the right tool for your treatment decisions for neonates, pediatrics and adults.

VIASYS Healthcare is the only company that offers a full range of Lung Protection Ventilation: High Frequency Oscillatory Ventilation, Automatic PV Curves, SiPAP, Heliox Ventilation and LPV Strategy Assistance.

**Our name is VIASYS Healthcare.
Our products are synonymous with Lung Protection.**

Today: SpCO[®], SpMet[™] and Perfusion Index on the Proven Platform of Masimo SET[®] Read-Through Motion and Low Perfusion[™] SpO₂ . . .

Tomorrow: Same Platform, More Innovations

Introducing Masimo Rainbow SET Pulse CO-Oximetry. The right choice for tomorrow. Right now.

Why settle for conventional pulse oximetry when Masimo Rainbow SET lets you reap the benefits of tomorrow's technology, today? Conventional pulse oximetry uses only two wavelengths of light to distinguish oxygenated from nonoxygenated hemoglobin and fails to work during motion and low perfusion. Masimo Rainbow SET—built on the gold-standard Read-Through Motion and Low Perfusion technology of Masimo SET—uses multiple (7+) wavelengths, housed in a single simple-to-apply sensor, to noninvasively and continuously measure carboxyhemoglobin, methemoglobin, oxygen saturation, pulse rate and perfusion index. But we're not done yet. Masimo scientists are hard at work qualifying new noninvasive parameters that can be field-installed on your Rainbow-ready monitoring devices through a simple software upgrade, so you can easily add them when they become available. Why settle for less?

For more information on the Masimo Rainbow SET platform, call 1-800-257-3810 or go to www.masimo.com/rainbow
