The new **Breeze C** brings to the market a high level of design and features that now provide better comfort, reliability and safety. Built from the proven heritage of the popular **Breeze S** models, this new mid-size version incorporates advanced engineering, safety, fully active front and rear suspension and stylish design.

The tiller control lever has a gas sprung activator that is easily adjustable for optimum ergonomic positioning for the user. For fast status recognition, the easy-to-read control panel displays all the relevant information the driver requires in a simple format and safety is enhanced with a water-protected ignition switch.

Breeze C is the ultimate mobility scooter for urban environments. It offers stable, reliable, and worry-free driving on smooth surfaces or rough terrains.
